* This jurisdictional table depicts the essence of the rule of the NYS Highway Law and its core intent. However, in the event of disputes or uncertainty, individual project maintenance jurisdictional tables should be referred to for a case by case break-down of jurisdictional responsibilities, as agreed upon by various agencies in signing the record plans. As with most rules, there are always exceptions.

** NYSDOT is responsible for all Canal bridge structural maintenance but the Canal Corp. is responsible for all electro-mechanical repairs and maintenance on movable parts of the lift bridges.
